

## **ATAC Resources Ltd. to Present at the Precious Metals Summit in Zurich and London**

November 3, 2017 - Vancouver, BC - ATAC Resources Ltd. (TSX-V:ATC) (“ATAC”) is pleased to announce its participation in the Precious Metals Summit in Zurich and London, November 7-9, 2017.

At the Precious Metals Summit, ATAC’s President and CEO, Graham Downs, will be giving a presentation and update on ATAC’s completed 2017, \$10 million exploration program at the Osiris and Rau Projects within the Rackla Gold Property, Yukon. Mr. Downs will also be discussing ATAC’s recent partnership with Barrick Gold Corporation and the exploration work they completed on the Orion Project in 2017.

### **Precious Metals Summit, Zurich, Switzerland – November 7-8, 2017 – Park Hyatt Zurich**

ATAC Corporate Presentation: Tuesday, November 7 at 9:45 – 10:00 am

### **Precious Metals Summit, London, UK – November 9, 2017 – Hyatt Regency - The Churchill**

ATAC Corporate Presentation: Thursday, November 9 at 2:15 – 2:30 pm

If you are attending either conference and would like a chance to meet with management, please contact Vanessa Pickering, ATAC’s Manager of Corporate Communications via email at [info@atacresources.com](mailto:info@atacresources.com) or by telephone 604-687-2522.

### **About ATAC**

ATAC is a Yukon-based exploration company focused on developing Canada’s only Carlin-type gold district at the Rackla Gold Property. Recent work on the ~1,700 km<sup>2</sup> property has resulted in a positive Preliminary Economic Assessment for the Tiger Gold Deposit, drilling of multiple high-grade Carlin-type gold zones and the identification of numerous early-stage gold exploration targets. ATAC and Barrick recently partnered to explore the Rackla Gold Property’s Orion Project, with Barrick having the option to earn up to 70% of Orion by spending \$55 million in exploration. ATAC is well-financed with approximately \$13 million in its treasury and has recently completed a budgeted \$10 million exploration program at the Osiris and Rau Projects (which are not subject to Barrick’s earn-in right), while concurrently working with Barrick to advance the Orion Project.
